

Sunright Corporate Press Release

SUNRIGHT REPORTS 26 PERCENT RISE IN TURNOVER

Singapore, April 19, 2000 – Sunright today announced financial results for the first six months ended 31st January 2000.

Group turnover for the period under review was S\$ 75.5 million, an increase of 26 percent over turnover of S\$ 59.8 million in the first half of the previous year. This was attributed mainly to higher revenues from burn-in service and equipment sales.

“We closed the first half with strong backlogs for burn-in and the demand continues to grow for the next six months, explained Mr. Sam Lim, Executive Chairman & Chief Executive Officer of Sunright Limited.

The Group achieved a profit after tax of S\$ 1.0 million for the six months ended 31st January 2000; this is comparable to the previous corresponding half year.

However, the Group saw a decline of 18 percent in operating profit to S\$ 14.7 million from S\$ 17.9 million. This was the result of a slower than expected recovery in Testing services.

Mr. Lim explained, “the Group has achieved initial success in providing burn-in and testing of micro-controllers (“MCUs”) and Digital Signal Processors (“DSPs”) with leaders in their respective markets”.

He added, “this sets the stage to serve MCU and DSP markets which are the highest growing segments of the semiconductor industry”.

About Sunright

Sunright Limited, a main board listed company on the Singapore Exchange Securities Trading, is the world’s largest independent provider of burn-in and test services, and a leading manufacturer of parallel test and burn-in systems. Sunright also distributes high technology equipment and materials and engages in selective OEM assembly of electronic components. It has a total workforce of 2,500 employees with annual revenue in excess of S\$ 100 million. Sunright’s customers include multi-national semiconductor manufacturers, namely AMD, Hyundai, Hewlett-Packard, Infineon, Motorola, NEC, National Semiconductor, Texas Instruments, Toshiba and others.
