SUNRIGHT LIMITED

## Press Release

### **SUNRIGHT'S SUBSIDIARY WINS PRESTIGIOUS INTEL'S PREFERRED QUALITY SUPPLIER AWARD**

[Singapore, March 22 2005](#): - A subsidiary of Singapore-based Sunright Limited (SGX: Sunright), KES Systems & Service (1993) Pte Ltd (KES), was named a recipient of Intel Corporation's Preferred Quality Supplier (PQS) award for outstanding performance in providing products and services deemed essential to Intel's success. The company was awarded for its efforts in supplying Intel with burn-in boards, burn-in board repair and maintenance services. KES was honored at a celebration in Burlingame, California, on March 15 2005.

"It is an honor to be awarded the PQS award by Intel", said Mr. Sam Lim, Executive Chairman & Chief Executive Officer. "We look forward to continuing our relationship with Intel and expect greater accomplishments in the future".

"KES has shown excellent performance in new technology introduction, value engineering and quality," said Steve Strauss, Director of Intel Test Operation. "The 2004 PQS Award is recognition for KES' commitment to innovation, continuous improvement and quality".

The PQS awards are part of Intel's Supplier Continuous Improvement (SCQI) process that encourages suppliers to strive for excellence and continuous improvement. To qualify for PQS status, suppliers must score 80 percent on a report card that assesses performance and ability to meet cost, quality, availability, delivery, technology and responsiveness goals. Suppliers must also manage and deliver on a challenging improvement plan and a quality systems assessment. Additional information about the SCQI program is available at <http://supplier.intel.com/quality/>.

Intel also recognized PQS award winners on March 15 with an advertisement in the U.S., Europe and Asian editions of The Wall Street Journal.

### **About Sunright**

Sunright Limited, a main board listed company on the Singapore Exchange Securities Trading Limited, is the world's largest independent provider of burn-in and test services, and a leading manufacturer of parallel test and burn-in systems.
