[Singapore, March 14 2008](#): - Singapore based Sunright Limited (SGX: Sunright) today announced results for the first six months of financial year ended 31 January 2008.

Turnover decreased 12 percent to S\$58.9 million for the first six months of 2008 from S\$67.3 million in the same period of financial year 2007. Nevertheless, Sunright is pleased to announce a Net profit of S\$5 million. Profit before tax improved by 71 percent due to a strong contribution from associated companies.

“The decline of 12 percent in Turnover for the first six months, reflected a slowdown experienced in all our sectors of our business operations,” remarked Mr. Sam Lim, Executive Chairman and Chief Executive Officer of Sunright Limited.

Mr. Lim continued, “The slowdown in the worldwide semiconductor market had affected the capital spendings for new equipment of major global semiconductor manufacturers. Although we have collaborated with our major customers in the development and support on wireless, microprocessors and chipsets, these new projects are being delayed.”

In December 2007, industry sources expected the semiconductor industry to grow at 6.2 percent with revenues reaching US\$286 billion in 2008 from US\$270 billion in 2007. However, earlier this month, semiconductor market growth estimate for 2008 was lowered by almost half to 3.4% with revenues of US\$279 billion.
