**Notes:**

Included in cash and cash equivalents was an amount of S\$312,000 (2014: S\$27,000) bank overdrafts.

During the financial period ended 31 January 2015, the Group generated S\$13,328,000 and S\$4,092,000 from its operating activities and financing activities respectively, and used S\$20,306,000 in its investing activities. These resulted in a net decrease of S\$2,886,000 in the Group's cash and cash equivalents as compared to 31 July 2014.

**1(d)(ii) Details of any changes in the company's share capital arising from rights issue, bonus issue, share buy-backs, exercise of share options or warrants, conversion of other issues of equity securities, issue of shares for cash or as consideration for acquisition or for any other purpose since the end of the previous period reported on. State also the number of shares that may be issued on conversion of all the outstanding convertibles, as well as the number of shares held as treasury shares, if any, against the total number of issued shares excluding treasury shares of the issuer, as at the end of the current financial period reported on and as at the end of the corresponding period of the immediately preceding financial year**

There were no changes in share capital during the financial period.

The Company did not have any outstanding convertibles as at 31 January 2015 and 31 January 2014.

There were neither treasury shares nor share option outstanding as at 31 January 2015 and 31 January 2014.

**1(d)(iv) A statement showing all sales, transfers, disposal and cancellation and/or use of treasury shares as at the end of the current financial period reported on.**

Not applicable.

**2. Whether the figures have been audited or reviewed, and in accordance with which auditing standard or practice**

The figures have not been audited or reviewed by the auditors.

**3. Where the figures have been audited or reviewed, the auditors' report (including any qualifications or emphasis of a matter)**

Not applicable.

**4. Whether the same accounting policies and methods of computation as in the issuer's most recently audited annual financial statements have been applied**

The Group had applied the same accounting policies and methods of computation in the financial statements for the current reporting period compared with those of the audited financial statements as at 31 July 2014, except for those as disclosed in Note 5 on page 8.

**5. If there are any changes in the accounting policies and methods of computation, including any required by an accounting standard, what has changed, as well as the reasons for, and the effect of, the change**

In the current financial period, the Group had adopted all the new/revised Financial Reporting Standards (FRS) and Interpretations of FRS (INT FRS) that are effective for annual periods beginning on or after 1 August 2014. The adoption of these standards and interpretations did not have any effect on the financial performance or position of the Group and the Company, except for those as disclosed below.

On 1 August 2014, the Group adopted the FRS 110 *Consolidated Financial Statements*.

FRS 110 establishes a single control model that applies to all entities. The changes introduced by FRS 110 will require management to exercise significant judgment to determine which entities are controlled, and therefore are required to be consolidated by the Group, compared with the requirements that were in FRS 27 *Separate Financial Statements*. Therefore, FRS 110 may change which entities are consolidated within a group.

Upon application of FRS 110, the Group has reassessed its investments in accordance with the new definition of control. The Group's investment in associates met the conditions for "de facto" control under FRS 110 *Consolidated Financial Statements*. Upon adoption of FRS 110, the Group changed its accounting policy to consolidate the financial statements of the associates with the financial statements of the Company and its subsidiary companies on a line by line basis. The consolidation of the associates' financial statements changed the presentation of the Group's investment in associates on the Balance Sheet of the Group and its share of results on the Group's Statement of Profit or Loss and Other Comprehensive Income respectively, but will not have any effect on the consolidated net assets of the Group or the net profit attributable to the equity holders of the Company.

The changes in accounting policies have been applied retrospectively. The effects of adoption on the financial statements are as follows:

- (a) any significant factors that affected the turnover, costs, and earnings of the group for the current financial period reported on, including (where applicable) seasonal or cyclical factors; and**
- (b) any material factors that affected the cash flow, working capital, assets or liabilities of the group during the current financial period reported on**

Review of statement of comprehensive income

The Group's revenue increased by S\$3.6 million or 5%, from S\$67.1 million in the previous corresponding period, to S\$70.7 million for the current half year. This increase was attributed to higher demand from the burn-in, testing and electronic manufacturing services segment.

Interest income was lower by S\$0.1 million or 17%, mainly because of lower deposits.

Raw materials and consumables used, as well as changes in inventories of finished goods and work-in-progress, decreased by S\$2.0 million or 11%, from S\$18.8 million to S\$16.8 million, mainly due to lower sales from electronic manufacturing services.

Employee benefits expense was higher by S\$0.9 million or 4%, mainly due to higher staff compensation.

Depreciation was higher by S\$1.2 million or 11%, from S\$10.5 million to S\$11.6 million, as additional machinery and test equipment were purchased during the year.

There was a reversal of an impairment loss on property, plant and equipment, of S\$0.4 million, in the previous corresponding period, as a result of the disposal of certain impaired equipment.

Fair value loss on held for trading investment securities, was higher by S\$0.5 million, from S\$0.3 million to S\$0.7 million, following lower market valuation of the investments.

Other operating expenses decreased by S\$0.3 million or 3%, primarily due to an increase in exchange gain of S\$0.7 million, arising mainly from appreciation of US Dollars against Singapore Dollars and Malaysian Ringgit, on US Dollars denominated receivables; offset by higher utility costs of S\$0.4 million.

Consequently, the Group reported higher profit before tax of S\$3.8 million, in the current financial period, from S\$0.7 million in the previous corresponding period.

Review of statement of financial position

Non-current assets increased by S\$9.4 million, from S\$67.1 million as at 31 July 2014, to S\$76.5 million as at 31 January 2015, mainly due to the purchases of machinery and test equipment.

Current assets were lower by S\$6.6 million, from S\$113.1 million to S\$106.5 million, largely because of (i) lower cash and cash equivalents (excluding overdrafts), by S\$2.9 million, as funds were employed in the purchase of property, plant and equipment; (ii) a decrease in trade and other receivables, by S\$1.3 million, due to improved collections; (iii) lower inventories by S\$1.2 million, due to higher sales; and (iv) lower carrying value of the investment securities, by S\$1.0 million, due to fair value loss.

Current liabilities increased by S\$2.4 million, from S\$38.8 million to S\$41.3 million, largely attributable to additional loans and borrowings of S\$4.3 million, to finance the purchases of machinery and test equipment; offset by lower trade and other payables by S\$2.0 million, following repayments to trade payables.

**9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results**

No significant variance.

**10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months**

World-wide semiconductor revenue is projected to reach US\$358 billion in 2015, representing a growth of 5.4%, from US\$340 billion in 2014.

The International Monetary Fund has projected moderate GDP growth in 2015. The decline in oil prices is expected to provide additional support, to global growth. The United States has raised its growth projections. All these developments augur well for the outlook.

Nevertheless, the prolonged weakness in demand; low inflation; the possibility of deflation in the Eurozone and Japan; and the uncertainty over monetary policy adjustments in key advanced economies; are areas of key concerns.

The Group will remain vigilant and innovative, to service and deliver value to its customers and to offer total solutions.
